		<p>Hello Bosses! First of all a hearty congratulations for making it big! I hope you and your near and dear ones are safe and would like to thank you for taking your time to guide us for this.</p> <p>I am targeting companies like Salesforce and Amazon, and hence had chosen Spring tech stack... I am at an advanced stage of completing a Twitter Clone (sans the latest features like</p> <p>All these projects are backend intensive since I only like that and now I want to learn Kafka, Redis and Spring Security but have put that on hold as my DSA is not as solid as compared</p> <p>For DSA I have as of yet solved only 150 medium and hard (80:20 ratio) LeetCode problems exclusive to Arrays, Strings, Searching and Sorting and Recursion/Backtracking the rest to</p> <p>I actually don't want to hurry up w.r.t. to Problem Solving as I feel I should try to do dry run and all and start from brute force till optimised and at the same time balance that with develop</p> <p>Pursuant to this is it advisable to give up on Internships and be rock-solid for placements or is someone of my situation in a position to crack these types of companies...</p> <p>Thanks for going through it bosses!</p> <p>Regards</p>					
6/5/2021 13:31:24	2019ucp1900@mnit.ac.in	Is it mandatory to make project on full stack development.					
6/5/2021 13:46:21	2019ucp1274@mnit.ac.in	Project on frontend only will not work?(for internship)					
6/5/2021 14:49:42	2019ucp1429@mnit.ac.in	How much non coding questions are asked (like system design, or any other mcq)					
6/5/2021 15:35:57	2020ucp1165@mnit.ac.in	As we have to mention some projects in our resume..so which one is good.web development or android development?					
		<p>Q1. How to balance College, CP and Dev?</p> <p>Q2. How many problems, platform, difficulty and Hours are sufficient to become a good coder?</p> <p>Q3. Should we go for opensource dev?</p> <p>Q4. What kind of projects should we make for resume?</p> <p>Q5. How to build a strong resume?</p> <p>Q6. How to grab an internship in 4th semester?</p> <p>Q7. Should we opt for Android Dev or Web Dev (according to market need and difficulty)?</p> <p>Q8. How to stay motivated during solving cp questions?</p> <p>Q9. How to maintain regularity in solving question?</p> <p>Q10. What skills should we acquire to create an edge over other students in interviews?</p> <p>Q11. Should we go for ML or stay with Dev?</p> <p>Q12. How to improve cg and what is the ideal cg for placements and does CG matters to that extent?</p>
